

Questionnaire for Local Authorities

Re-use and Preparing for re-use of (W)EEE in Europe – legal aspects, methodologies and statistics

LIFE – REWEEE Project

This questionnaire¹ is designed to: **identify existing assessment methods** of WEEE re-use and preparing for re-use in order to develop a report outlining the different tools and assessment methodologies that exist today in the EU

To enable an accurate assessment, it is important that all information requested should be provided as completely and accurately as possible. Wherever you cannot answer a question we would appreciate a short justification e.g. ‘lack of data’

Please note that no company-specific / individual-information will be released. All information provided is strictly confidential and will be aggregated to provide an overall view of the (W)EEE re-use sector in EU.

I have been informed about the purpose of this study, which is conducted within the framework of LIFE – REWEEE project, and I participate voluntarily

Please send your responses and any questions to Mathieu Rama (mathieu.rama@rreuse.org) and Christina Chroni (chroni@hua.gr) until the 9th of December.

¹ This questionnaire was elaborated within the framework of the EU LIFE-REWEE project (LIFE 14 ENV/GR/000858), which aims to reduce WEEE through the implementation of prevention and preparation for re-use actions. For further information on the LIFE- REWEEE project, please refer to the project website <http://reweee.gr>

Basic Information:

Name – Surname	
Region – Country	
Organisation / company name	
Role in the Organisation /company (optional)	

Questions²:
1.

Does your local authority collect statistics from its partners on re-use and/or preparing for re-use activities of (W)EEE?

- Yes
 No (If no, please go to question 6)

2.

Please indicate the amount of appliances in total your local authority, or organisations working on your behalf, both collected and re-used/prepared for re-use in 2015:

2015	Tonnage collected	Number of items collected	Tonnage re-used / prepared for re-use	Number of items re-used
EEE (non-waste)				
WEEE (waste)				

3 (a).
Source of your appliances

- i. From where do your partners source their appliances for re-use and/or preparing for re-use? (e.g. waste collection points, direct donation, household collection etc.)
- ii. What proportion do those sources represent in your total collection?
- iii. Please indicate for each source if the appliances are considered as EEE (non-waste) or WEEE (waste).

Source	Proportion	WEEE or EEE

3 (b).

If you do not have statistics concerning the source of appliances, is it possible to estimate where the majority of appliances collected originate from?

² Questions concern the implementation of Action B1 of the LIFE REWEEE project.

4.

Under what circumstances (if any) are the appliances collected by your partners considered as a non-waste? For example is direct donation to re-use partner considered a waste or non-waste?

5.

When do you consider an item as being reused / prepared for re-use?

- When made available on the market
- When sold or donated

6.

From a policy perspective, what in your view could increase the re-use of EEE and/or the preparing for re-use of WEEE?

7.

Any other comments or feedback

Thank you for participating!
