in 15 European countries including NGOs, repair networks, labels, academics

WHAT DO WE WANT ?

Make the Right to Repair as mainstream and inclusive as possible

Universal Right to Repair: access to spare parts and information for all, not just pros

Urgent action from policy makers on longer lasting and more repairable products, both at EU and national level

Integrate repair in wider agenda such as climate change, circular economy, environmental justice, socio-economic inequality, SDGS

WHAT DO WE WANT (POLICY)?

Good design

In order to make products which are easy to repair we need design practices which support disassembly, access to spare parts and repair manuals.

Short term goal: Ecodesign for all products starting with smartphones and laptops

WHAT DO WE WANT (POLICY)?

Fair access

Repair should be accessible, affordable & mainstream.

Short term goal: National registries of professional repairers which are fair and inclusive

WHAT DO WE WANT (POLICY)?

Informed consumers

Information on product durability and repairability, as well as repair information should be made available to citizens as well as repairers.

Short term goal: An EU repairability label

WHAT HAVE WE DONE?

**RIGHT TO
REPAIR**

WE WANT **REPAIRABLE**
SMARTPHONES.

WHAT HAVE WE DONE?

21 April 2020

Why repair is essential in times of crisis

Repair is essential to our society, and repairers play a crucial role, now more than ever. Yet, in many countries they're not considered "essential".

WHAT HAVE WE DONE?

WHAT HAVE WE DONE?

A collage of images related to repair and community. It includes a woman in a green shirt, a woman in a white t-shirt, an elderly woman in a white shirt, a man in a workshop, a man in a pink shirt, a man in a blue shirt, and a man in a green shirt. The collage is overlaid with a purple banner containing the text 'HEROES OF REPAIR' and 'RIGHT TO REPAIR'. The website 'REPAIR.EU' is also visible.
